- WhatsApp purchase links, where implemented and tested.
- HTML and CSS-based website design.

Reason for Choosing the Colour Palette

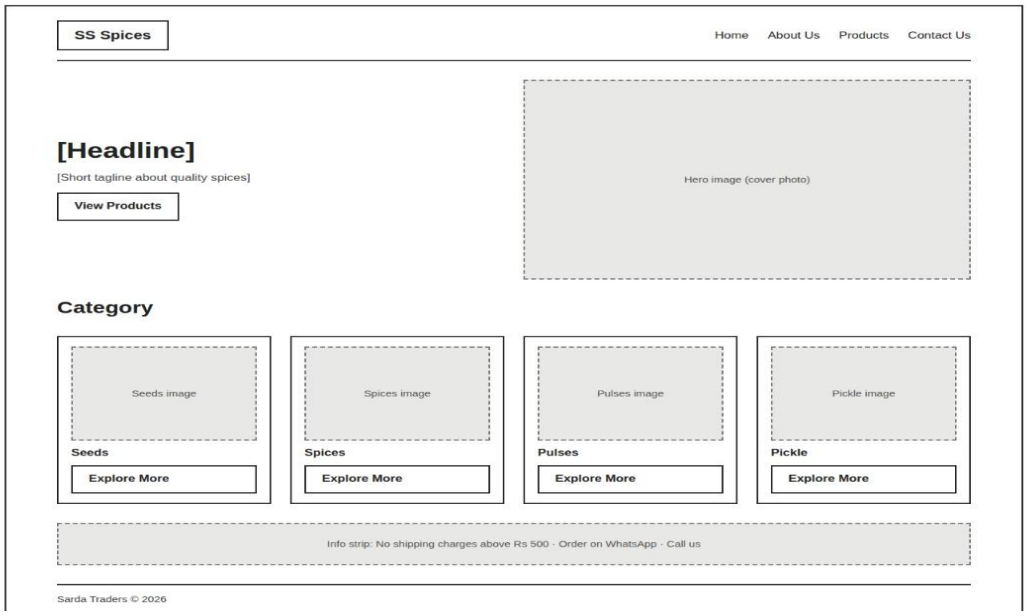

I selected a warm, spice-inspired colour palette for the SS Spices website to reflect the nature of the business.

Deep brown represents an earthy and traditional feel, while spice red adds warmth and visual strength. Turmeric gold creates highlights that draw attention to important elements. The warm cream background keeps the overall design light and comfortable to view.

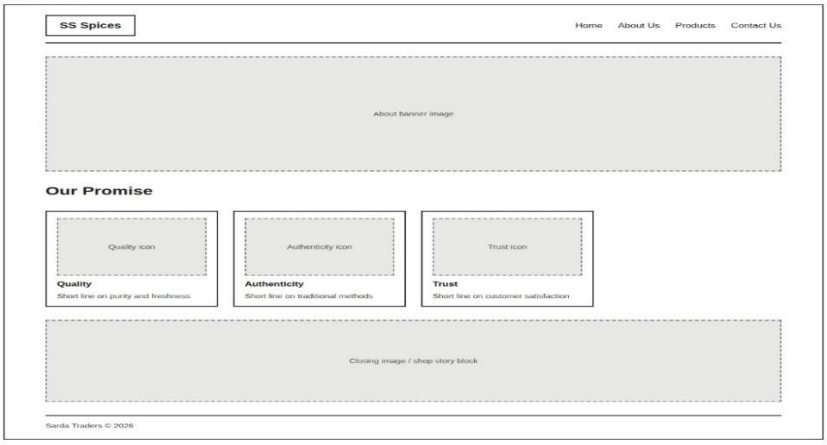

I used these colours to create a consistent visual identity that suits a spice business. I also considered readability and contrast when combining text and background colours.

AI Use Declaration

AI USE DECLARATION

AI Tools	*What we asked it to do*	*What we wrote, changed or checked myself*
ChatGPT	Asked for suggestions for website colours and layout ideas.	We selected the final colour scheme and designed the pages according to the brand's aesthetic.
Claude	Took help with a few HTML and CSS errors and basic coding concepts.	We wrote and edited the whole code, adjusted the styling ourselves, and tested the website to check how the pages looked and worked.
Claude	Asked for suggestions to improve the presentation of products and the FAQ section	We customized the sections, added product categories, and made design changes based on my own ideas.

Declaration: I/We confirm that this entry is our own work, that every AI tool used is listed above, and that I/we can explain every part of the submitted code.
